Executive Summary & Actionable Proposals

- **The Core Bottleneck:** The Normal/At-Risk segment accounts for the largest user share yet suffers from the lowest retention, primarily leaking out before reaching critical platform value.
- **The Aha! Thresholds:** System-wide behavior proves that customer retention jumps to **45% at Transaction 3** and hits a loyal saturation ceiling of **99% at Transaction 5**.
- **The Churn Driver:** Over **18% of users (Branch A3)** churn because they experience an abrupt "billing shock" after two zero-cost transactions, facing standard pricing (395.29) that matches or exceeds paid-from-start users.

Strategic Proposal: Implement Stepped-Value Half-Pricing at Transaction 3 to lower the conversion barrier, successfully bridging free-tier users past the Aha! milestone into long-term subscription loyalty.
